

## Robotics and Best Kids Academy Summer Camp

### Program I: Robotics Camp

WeBotics	NXTBotics	EV3Botics
		
Ages 5 - 8	Ages 8 - 12	Ages 9+
STEM based program. Students learn the function of each part of LEGO ©, like gears, sensors, and motors. They will use computers to do simple programming to make projects come to life.	STEM based program. Students build autonomous robots that move according to the programs downloaded to the brain. NXT involves light, sound, color, touch, motion, and temperature sensors.	This level requires the prior training in NXT for best level of understanding. EV3 is used in our year round competition due to their strong programming and functionality.

**Half Day Robotics Camp for Students Ages 5 – 14! Monday – Thursday 9 AM – 12 PM**

Camp Dates:

Camp I: Monday June 11th – Thursday June 14th  
Camp II: Monday July 9th – Thursday July 12th

### Program II: FULL DAY CAMP with Best Kids Academy Summer Camp Ages 5 – 14

Summer camp at Best Kids Academy will be filled with fun, adventure, and learning. There will be opportunities for swimming, a sports tournament, and a field trip on Friday. In the afternoons, there will be FREE language lessons provided. Campers will be able to choose between Spanish or Chinese.

Lunch is available \$24/week – place order with Best Kids Academy, or bring own lunch.
